Product description

The Max power of the relay is 42W, which mean the power of your (all) LED bulbs must low than 42W. If more than 42 W, load resistors may be required.

This auction feature this 2-Pin Electronic LED Flasher Relay, works for most motorcycle/bike to fix the LED bulbs related turn signal light hyper flashing, not function properly issues.

By using this 2-pin LED flasher, you can install the LED bulbs for the motorcycle/bike for turn signal lights without have to cut the wires to install the load resistors and completely eliminate the LED rapid flashing problems.

Besides, this 2-pin Electronic LED Flasher is also speed adjustable. You can use a flat head screw driver to adjust the knob on the bottom to set its flashing speeds from 50c/m to 200c/m.

More Details :

- Operating Voltage: 12V
- Max Power: 42W
- Flashing Frequency: 50 times/min to 200 times/min
- Switch Power: 0.02A to 12A
- Operating Temperature: -40°C to +80°C Work to replace most 2-pin flasher

Package Included:

- 1 x 2-Pin Relay

About the Brand:

- Brand Name: AUDEW
- Our Vision : Provide the most cheap beauty products to help you upgrade your beloved vehicle and let you feel the most sincere service Your encourage is our motivation to discover the trend of fashion and create your dreaming products. Make your car outstanding , enjoy your life.

Tips :

- If you find that it can not work with your led system when use it, Please contact us by Amazon email, we will give you a full refund.

Question:

Does this flasher emit any sound when flashing..? Beeping, clicking, etc...?

Answer:

No noise at all,works good with led flashers.
By Tony W. on May 7, 2017

Question:

will this flasher do mix of standard and led bulbs?

Answer:

I tried that very same flasher. The first time it worked and then we tried it a couple das later and it would only come on but not flash.
By Robert O. Forsha on January 16, 2017

Question:

Flasher will not work on my 100% led turn signals. How do i make this work

Answer:

I had the same problem with this flasher. I added a 330 ohm resistor connected from the 'L' (Lamp) terminal to ground in order to provide sufficient voltage to drive the flasher circuit. LED flasher circuit now pulls about 200 mA and works perfectly!.
By Bob Goppold on October 4, 2019

Question:

Will it work on my 05 Victory Vegas?

Answer:

It will work on anything that is 2 pin. You may have to change the connection point. This works very well with L.E.D a well. You can speed the flash up or slow it down. Hope this helps.

Watch the video review, does NOT work with 100% LED.

Reviewed in the United States on August 3, 2017

Verified Purchase

Do yourself a favor and watch the video review (https://www.amazon.com/gp/customer-reviews/R1W34YQB9W8GC1?ref=va_cr_lb) showing how this flasher does NOT work with 100% LED systems (or my particular unit is junk). Wish I did. Minimum current draw is advertised at 0.02A. EACH bulb I'm using is 0.22A so in theory it should work. When adding an incandescent bulb to the circuit the flasher worked properly, so the likelihood of a faulty unit is minimal. What a waste of \$7. I will be purchasing another relay from another seller.

EDIT: Note to anyone shopping for LED relays. After some shopping, a common theme between real "no load" flashers is a third pin or ground cable. This ground cable allows the relay to function independently from the bulb load, the relay being controlled by a separate circuit. Thereby allowing the lights to flash at the same specified rate, no matter how large or small the load is. In short, unless a resistor is built into the circuit, NO 2 pin relay will work.

Added turn signlas to my dirt bike

Reviewed in the United States on November 7, 2018

Verified Purchase

Made my dirt bike street legal and wanted turn signals. This worked perfect. Simply wire inline with either wire from blinker.

Example. You could have the - or black wire from battery to one connection on relay. then from second relay to one wire from blinker switch. then from second wire on blinker switch to - or black on light. the red or + cable from light to battery +.

Works great for 1972 Honda cb350

Reviewed in the United States on October 20, 2018

Verified Purchase

Installed on my 1972 CB350. Worked great and adjusting the blinker speed was very simple. I upgraded all my OEM bulbs to LED and this worked like a charm. It doesn't make a clicking sound, just FYI. So far it's working great. Will update if I have any issues.

Just installed...

Reviewed in the United States on March 7, 2019

Verified Purchase

Put this flasher on my 1994 DR 350 SE and blinkers worked perfect right away.

The erratic flashing stopped caused by my new LED blinkers. Also, was easy to install. If for some reason flasher unit stops working, I will update this review.

Perfect!

Reviewed in the United States on May 7, 2018

Verified Purchase

Exactly what I was looking for. I am converting my 1983 Yamaha Virago xv920 into a cafe racer. When installing the new turn signals which are a smaller and lesser wattage than the originals, I could not get the original relay to function. This took care of my issues and turn signals function beautifully. Easy to install and so far seems quite durable. Turn signal duration and speed are easily adjusted with a small screwdriver.

★★★★★ **actually works for led signals on motorcycle**

Reviewed in the United States on February 19, 2019

Verified Purchase

This actually works! I'm surprised that this works at this price point. I used it after converting all the signals on a motorcycle to LED's. After replacement, all 4 flashed at once. If that happens, you have to remove the turn signal indicator bulb from the dash of the motorcycle. It works perfectly then.

★★★★★ **Great upgrade for the price.**

Reviewed in the United States on July 4, 2018

Verified Purchase

This flasher relay works great. It allowed me to get rid of my thermal relay that would not work with LED lights.

With this flasher I was able to install LED lights on my turn signals and my wiring did not need any modification. Have only had installed for about 2 weeks so i can not yet speak of the durability.

 zash13

★★★★★ **It works.**

Reviewed in the United States on March 21, 2017

Verified Purchase

I have a '92 Suzuki DR350S and installed new turn signals. They were not LED, but they have a low current draw like LED's. The stock flasher relay needs the high current draw of the original turn signals to function. With my new turn signals, the stock flasher would not activate (flash). The turn signals would come on solid and stay on. They were not pulling enough current to activate the stock flasher. This flasher relay fits the motorcycle's pins and even the factory mount with that tab on the side. Plugged it in and it works, period.

 Amazon Customer

★★★★★ **This just might be the one you're looking for.**

Reviewed in India on November 11, 2019

Verified Purchase

Works as intended and thus I have absolutely zero complaints whatsoever. Ease of installation depends on the motorcycle since the product itself is plug'n play. I however had to undo several panels since Kawasaki likes playing hide and seek with their relays.
